

COLE BOWMAN

516-225-9832 | Ithaca, NY | cb935@cornell.edu | [linkedin.com/in/cole-bowman](https://www.linkedin.com/in/cole-bowman) | github.com/cole-b216 | cole-b216.github.io

EDUCATION

Cornell University, College of Arts & Sciences

Ithaca, NY

Bachelor of Arts in Computer Science, Minors in Game Design & AI

Expected May 2028

- **GPA:** 3.61/4.0 | **Honors:** QuestBridge Scholar, Cornell Tradition Fellow, U.S. Presidential Scholar Candidate
- **Relevant Courses:** Discrete Structures, OOP & Data Structures (Java), Computer System Organization (C), Functional Programming, Software Testing, AI Reasoning & Decision Making, Web Development, iOS Development

EXPERIENCE

Undergraduate Teaching Assistant (Consultant)

Aug 2024 – Present

Cornell CS 1110, Introduction to Computing: Design and Development

Ithaca, NY

- Promoted to Office Hours Section Lead; support 700+ students through lab sessions and office hours
- Deployed Python grading scripts checking correctness and design adherence, cutting grading time by 80%
- Coached 50+ students one-on-one across semesters in debugging, recursion, and design, with letter-grade gains

Videogame Software Developer

Sep 2024 – Present

Cornell Development in Games Association (DGA), Studios Project Team

Ithaca, NY

- Contribute to Veil-Sur, a horror game about a robotic photojournalist, on a selective, credited 30-person Studios team that takes a game from ideation to release in a year; currently blocking out the facility's floors and environment
- Built the in-game dialogue manager and document viewer for puzzle-solving, showing each document's image and text for accessibility
- Participate in technical workshops with industry professionals from companies like Roblox; this outreach contributed to an official DGA Roblox sponsorship, club-wide Roblox events, and PAX East funding for Studios members

PROJECTS

Cumulo-Climb | C#, Unity, ShaderLab, GitHub | Itch.io

Jul 2026

- Led the obstacle team and was top contributor by commit count on an 8-person cross-disciplinary DGA Studios team; used GitHub branches, pull requests, and code review to integrate gameplay with art assets and shipped a procedurally generated endless platformer to Itch.io in a 4-week cycle
- Designed a cosmic ray hazard with a distinct warning phase before its lethal phase, a rain-cloud collision state machine, and a storm-cloud stun mechanic, extending a shared BasicCloud class through C# inheritance and polymorphism
- Playtested and iterated on difficulty, redesigning a hazard's visual and functional footprint after early builds proved too easy due to a mismatch with integrated art assets

Spinboxd App and Extension | JavaScript, Node.js, Manifest V3, Claude, TMDb API

Aug 2026 – Present

- Build a Manifest V3 Chrome extension and web app that turn Letterboxd watchlists into an interactive movie picker with AI LLM integration
- Implement asynchronous DOM scraping and HTTP requests to process paginated watchlists of hundreds of films; integrated the Claude API so users can filter their lists by interests
- Integrate the TMDb API for metadata and posters with client-side caching, rate limiting, and error handling

Interactive Image Selection Tool (OOP Final Project) | Java, Swing, JUnit, Maven

Mar 2024 – May 2024

- Built an image selection tool in Java and Swing, using Dijkstra's algorithm for minimum-cost boundary paths
- Structured the app with Model-View-Controller architecture and used SwingWorker multithreading to run pathfinding without blocking the UI
- Achieved 100% function coverage with black-box and glass-box JUnit testing of graph algorithms and app behavior

LEADERSHIP

Lead Event Organizer

Dec 2024 – Present

Cornell University Esports, Marvel Rivals Team

Ithaca, NY

- Established Cornell's Marvel Rivals program, coordinating recurring matches and large events with collegiate teams
- Ran an 8-school Ivy League tournament (48 players), managing scheduling, brackets, and last-minute changes

TECHNICAL SKILLS

Languages: Java, Python, C#, JavaScript, TypeScript, C, C++, OCaml, SQL, HTML/CSS

Frameworks & Libraries: Node.js, Express.js, React, Socket.IO, NumPy, Unity, REST APIs

Tools: Git, GitHub, Linux, Docker, CI/CD, CMake, GDB, CTest, JUnit, Maven, Postman

AI-Assisted Development: Claude Code, Codex, Cursor, Antigravity CLI
